

LARGE DISPLAY

Protected against
electromagnetic interference

876

**LARGE
DISPLAY**

*The display is connected to the Reflex on one of
the two robust communication protocol RS485*

THE VEHICLE CAN BE EQUIPPED WITH TWO LARGE DISPLAYS ON EACH SIDE

Large outdoor display to monitor production in real time

- 3 digits of 5 1/2" LED GREEN
 - The protective lens is replaceable
 - Visible at 200 feet
 - Readable in full sun
 - Display in Lbs, Kg or Ton
 - Clear and non-diffused led
 - Intensity automatically adjustable to ambient brightness
 - For application on ground and underground
 - Water protection: resists powerful high-pressure water jets
 - Designed to accept fast atmospheric variations
 - Built to withstand aggressive environment
- Enclosure entirely in stainless steel
 - Electronics and LED fully sealed
 - Resist to impacts and jet of high pressure

SPECIFICATIONS:

- Supply: 9-30 Volt
- Led: High brightness technology
- Dimension WxHxD: 33x22x4 cm
- Enclosure: Stainless Steel
- Weight: ?? gr
- Operating temperature range: -50 à 80°C
- Sealed monitor: IP69K
- Communication: RS485
- Wiring jacket: TPE shielded
- Cable length: 10 meters
- Connector M12
- Protection againsts EMI
- Conforme EMC Directive 2004/108/EC
- Shock and vibration resistant
- Option: wireless communication
